Date: Oct. 31st, 1974 VOL. 2 No. 104

Fifty seven boxes containing medicines worth 200,000 Czechoslovak crowns arrived as a donation by the Afro-Asian Solidarity Committee of Czechoslovakia in support of the revolution in Oman.

More, 1500 sterling arrived also as a donation by the Iranian militants for the revolution in Oman.

The support and backing received by our revolution from the national and democratic forces in the world started to grow day after day.

P. F. L. O. Delegation Holds Successful Talks In Libya

Our People Determined To Win Their Freedom & Independence

The statement made by Azzawawi at Muscat during the past few days do not come out from the frame which was drawn up for the sake of deceiving and distorting facts according to the policy of the British Sultanate since the Iranians are existing in Oman and

this existence was recently reinforced. These Iranian forces are now on the verge of launching a campaign to ransack the liberated areas. This is a fact which the puppets in Muscat are trying to hide through their lies.

Azzawawi tried to give to his

statement some form of reality when he alleged that his country is still cherishing the presence of Arab forces by the side of the forces - which he calls the Omani forces - to fight the insurgents and to give an end to Communism", according to Qaboos in his press statement.

By this call Azzawawi is trying to convince the Omani citizens and the Arab and world public opinion that forces whom he calls as Omani forces are now alone in the field after they have been abandoned by the Iranians. In fact Azzawawi was trying to convince himself of the truthfulness of what he says.

The record of the struggle between our masses and their revolution and the colonialists and their puppets in Muscat proves that the troops of the British Empire have failed to confront the revolution, the failure which is justified by the puppets and the hired trumpets as based on the fact that the British do not want to end the revolution for its end means the end of their presence. In other words, the puppets tried and are trying to convince the public opinion that the British presence is attached to the presence of the revolution. Does not such talk stir sarcasm?

The British do not want to end the revolution which the puppets describe as Communist. This is a strange logic and the strangest thing was the announcement by Azzawawi that the Iranian forces which invaded Oman and with the aim of crushing the revolution have started to withdraw from the Omani territories. Has he knocked down the revolution without our knowledge or whether the 'Omani' forces will undertake such assignment. "We do not deny that the forces of the Qaboos mercenaries have been recently reinforced with modern and developed weapons and backed by experts from the European and Jordanian mercenaries. But this was not one

day a decisive factor for making the balance turn in favour of the imperialist and reactionary

Libya Shows Deep Understanding

A delegation from the People's Front for the Liberation of Oman paid a successful visit to the Libyan Arab Republic. Comrade Mohamed Ahmed Al-Gassani, member of the Central Executive Committee, made the following statement to Saut al-Thawra on his return back from Tripoli: "We made a successful visit to sister Libya in accordance with an invitation addressed by the Revolutionary Command Council. The delegation met the Libyan Premier, Major Abdel Sallam Jelloud, and members of the Revolutionary Command Council.

The People's Front delegation also explained to the Libyan brothers the seriousness of the Iranian military presence not only to the Arabism of the Gulf and its safety but also to the neighbouring Arab countries as the Iranian invasion of Oman is emanating from the expansionist policy of the Shah of Iran against the freedom of the Omani people.

The delegation also explained the nature of the British and Jordanian military presence and the nature of the aggressive war which is being launched by the Iranian, British and Jordanian forces and the mercenary forces of Qaboos against our homeland.

The delegation found every understanding from the Libyan brothers and this is something natural by the leaders of the 1st September revolution, which cleared Libya from the American and British military bases. The Libyan brothers showed opposition to the Iranian invading forces and British advisers and the military presence of

EDITORIAL

At a time in which the feet of the Iranian invaders were laid on Oman, trying to shatter our nationality and usurp our homeland in order to attach it to the Shah-in-Shah empire which is a dream of the Shah of Iran under the slogan of safeguarding peace and security in the area, voices of protest, indignation and resentment went high from the Arab and world national and democratic forces asking for the evacuation of the Iranian invading forces from the Omani territories.

What was the reaction of the Arab regimes and what is their stand towards the heroic struggle of our people in the face of the Iranian invaders, British colonialism and other mercenaries and puppets.

We find complete silence over what is going on in Oman as if the issues do not concern these regimes at all, with the exception of some of them. We only find some voices of resentment, protest and condemnation made by some of these regimes against the fascist clique in Chble. However, these regimes are not opening their mouths against what is taking place in an Arab territory in the Arab East. If the Jews have usurped Palestine and the Turks have annexed the Gulf of the Iskandarun, we say at least that this was because the Arab home was under colonialism and Arab reaction at that time and if we compare the past with present we will find that most of the Arab homeland was liberated from colonialism and established its national power.

The people of our beloved Oman are looking for the glittering future in which they will end the era of darkness. Therefore, this people is asking its brothers and other Arab national regimes as well as freedom and peace-loving forces to realise the dangers resulting from the new invasion and to fulfill their national and internationalist historical commitments during this critical stage of the struggle of our people.

After Qaboos had peeped from the galleries of the Arab League with the approval of the Arab rulers, do these not feel embarrassed towards a traitor responding to the aims of greedy persons in our country.

Recently, the national regimes realised the danger of this invasion and the complications of the situation. A fact-finding commission was formed in Oman but with great regret it did not find out facts except from the traitors of Muscat only. Will people know facts from the traitors? Of course, this commission stopped from visiting the liberated areas.

Now while the summit conference is on session, what would be their stand towards the situation in Oman? There appears in the horizons the signs of a new imperialist plan to liquidate the resistance and struggle of our patriotic people.

The statements of Azzawawi on the withdrawal of the Iranians and his welcome for their replacement by Arab forces and attitude of some Arab countries

(See Page 3)

Iranian Comprehensive Destructive War

The enemy Radio Station at Sallah last Wednesday broadcasted that air, land and sea forces of the Sultan are carrying out wide-scale operations in parts of the area of Dhofar. Finally, the puppet authority in Muscat Confessed that there is a wide-scale military campaign aiming at controlling the liberated areas. It, on the other hand, appears that it knows nothing about the military operations carried out by the Iranian forces and so the Omani Ministry of Defence. More they do not know that these forces have their special command and launch their criminal and barbaric raids against our people.

This statement denies all statements issued by the authority last week, by which they wanted to hide the extensive Iranian military campaign. The forces which launch war against our people in Dhofar are Iranian and mercenary forces and their operations are directed by the Iranian command.

However the statement reveals the falsehood of the claims made by the authority about the termination of the revolution in all areas and about its

control over the Red Line, the Eastern Region and other places, the enemies, more are confessing that they are carrying out air and land raids on all areas in Dhofar. This proves powerful resistance displayed by our people against the Iranian invaders and the failure of the invaders to realise any victories to an extent that made

them launch land, sea and air operations. In other words, a comprehensive destructive campaign is being launched against our people. We are revealing to the peace and freedom-loving forces the seriousness of the situation resulting from the Iranian aggression in Oman and ask them to adopt drastic punishments against the hireling

Sultanate and the British. We also affirm to all that our people will meet these raids with high revolutionary spirit and destroy all barbaric military campaigns. Our military people will continue heroic struggle until all invaders are checked off and real and genuine independence is realised for our country and homeland.

11th Anniversary of 14th Oct. Revolution Greeted

The Central Executive Committee of P.F.L.O greeted the leaders of 14th October revolution on the occasion of the eleventh anniversary of the glorious revolution. In its message, the Central Executive Committee expressed the admiration and pride of the revolution towards the stand of support taken by the masses of 14th October revolution and its leadership towards the struggle of our people.

The message says: "In the name of our militant people and in the name of the militants of the People's Front for the Liberation of Oman and its commands, we are pleased to extend to you and to the comrades in the National Front Political

Organisation and the brave Yemeni people warm felicitations and greetings on the occasion of the eleventh anniversary of the glorious and immortal revolution of 14th October, the revolution of the Yemeni masses against colonialism, injustice and exploitation.

This occasion falls while the Yemeni people are realising more giant achievements in the interest of the poor and oppressed masses and are continuing procession of their struggle confirming by that their determination to realise all objectives for which the revolution came.

Our militant Omani masses, while sharing the Yemeni people their joys during this dear occasion, wish - also - to stress upon the importance constituted by the revolution to the procession of the revolutionary movement in the Arab arena, in general, and the Arabian Peninsula, in particular.

The masses of the 9th June revolution, while sharing you the joys of this occasion, vows to the Yemeni people that they will continue the path of the people's liberation war until the last staunches of the colonialist presence and the Iranian invaders are swept out and the presence of the Jordanian mercenaries liquidated. We do not miss on this occasion to praise the revolutionary achievements accomplished by Democratic Yemen in the interest of the Yemeni masses in spite of the attempts made by the forces of imperialism and reaction for liquidating this revolutionary regime through

huge conspiracies woven by those forces. We affirm the admiration of our people for those revolutionary stands taken by the PDRY party, government and people towards the issue of our people and their continuous and endless support in their struggle against their enemies of the Arab liberation movement.

APPO Secretary General Reiterates PDRY Principled Stand

Comrade Abdulfattah Ismail, Secretary General of the Central Committee of the National Front Political Organisation, confirmed the firm and principled stand taken by the People's Democratic Republic of Yemen towards the struggle of our Omani heroic people led the People's Front for the Liberation of Oman against the puppet Qaboos regime and the Iranian invading forces.

Comrade Abdulfattah Ismail urged all forces of Arab liberation movement and the Arab national regimes to stand by the side of the vanguard of the Omani struggle - the P.F.L.O - and to condemn the puppet Qaboos regime, which betrayed the Arabism of the Gulf and turned Oman into a base for the Iranian invaders and imperialists.

This was demonstrated in a speech by Comrade Abdulfattah Ismail in the massive rally which was held at the headquarters of the National Front Central Committee on the occasion of the eleventh anniversary of the October revolution.

Message of Condolence on Death of Shadel Taqa

The Central Executive Committee of the People's Front for the Liberation of Oman condole the leaders of the Arab Baath Socialist Party on the death of the Foreign Minister of sister Iraq. This was contained in a cable of condolence reading as follows:

"We received with great sorrow the news on death of Foreign Minister of sister Iraq. The

Iraqi people lost one of the prominent militants. Please allow us to extend comradely condolences on behalf of the militants of the People's Front for the liberation of Oman and the masses of Oman."

Death of A Jordanian Intelligence Officer

Reports coming from the Eastern Region of the Southern area of Oman state that the forces of the People's Liberation army shelled Kheisal centre in the Eastern Region at the end of last month causing huge losses to the enemy forces. Those dead included a high-ranking Jordanian intelligence officer called 'Abu Khaled'. His death was received with great satisfaction by the citizens and the local tribal divisions present there due to the filthy and ugly role undertaken by this officer in the act of oppressions carried out not only against our masses but also against the members of the local divisions to serve his imperialist and n.d reactionary masters in Muscat.

Distortio n of The Enemy

The enemy is continuing to gather his striking forces which are composed of British, Iranian and mercenaries and local pupes. The enemy started huge preparations and wide-scale movements aiming at throwing all his weight and military potentialities in forthcoming operations which will be witnessed by the area shortly. In a bid to camouflage and distort things, it was announced that the Iranians are out. If the enemy is betting upon ending the revolution, let him once again try his luck which will not be better than that obtained during the past campaigns.

EVERYTHING IS AMERICAN IN IRAN

The Shah-in-Shah authority recently formed a special force which they called the "Green Berrets" parallel to the American force which was used by American imperialism in their filthy war against the brave Saut Al-Thawra Page 2

Vietnamese people.

This special Iranian force was given the task of the police and intelligence forces for following up the Iranian revolutionaries in a basic manner.

Al-Jufeir Base Hired Newly To American Navy

The Bahraini government agreed to renew the military agreement with the United States on the naval bases at Jufeir. This approval came after the visit which was made by the American Naval Minister to Bahrain last month.

It worths mentioning that the Bahrain government had threatened to abolish this agreement during the October, 73 war under the slogan of "Solidarity with the Arab countries". It appeared later that these threats have no foundation of truth and only aim at giving a national cast to the puppet regime

there. These threats at the time were received with sarcasm by the American military and political circles because they know thoroughly well the ability of the Bahraini regime to adopt such independent stands.

The thing that causes astonishment and surprise is that this approval of renewing this agreement came at a time in which the American official circles made threats about the possibility of using force against the oil Arab countries in order to force them submit to the American demands.

BAHRAIN: Henderson's Democracy In Trials

After three months following the wishful arrests and illegal investigations, torture and terrorism, the Henderson government in Bahrain forwarded a group of militants to trial and insisted upon holding the sessions in secret fearing that these trials might lead to an open indictment against the decayed regime.

In spite of the secrecy that surrounded the sessions, sentence were passed clearing three of the detainees as the Henderson intelligence was unable to prove any charge against them in spite of the illegal suspension which continued for three months during which the authority used all means of physical torture and terrorism in order to force the detainees to approve the fake charges directed against them.

Such decision stirs a huge ex-

EDITORIAL (Cont'd)

which is no longer secret and which calls for the evacuation of the Iranian forces and their replacement by Arab forces. All these are indications on what is being hidden for us by the enemies. The reality of the situation is one and the objective is one even if the Arab form in Oman is changed to take over position of Iranians as the question is only to safeguard the interests of imperialism and reaction in Oman and to establish the Qaboos regime and bury the struggle of the people and their pioneer revolution.

But the reality of the Iranian and foreign intrusion upon Oman will not stop. More, it will become even heavier and concentrated during this period in order to undertake stronger operations aiming at liquidating the revolution. If we have to believe the reality about the withdrawal of the Iranians; then this might take place only from unimportant positions in case matters went on in accordance with what was expected by imperialism and reaction. We warn these regimes against the consequences of falling into the plans of the enemies. Our people are not escape goats as they have defeated the colonialists and invaders and are prepared to resist all those who stand against their freedom and sovereignty over their land and the establishment of their own national liberation regime.

We urge all regimes to adopt a positive and just stand towards the struggle of our people against their enemies and to stand against all conspiracies and plans which aim against the struggle of our people. We ask that the puppet regime of Qaboos is to be exposed and condemned.

Saut El-Thawra — 3

clamation mark around these detective measures taken by the Henderson authorities in the so-called "era of democracy". Although the constitution stipulates the illegality of arresting any citizen without the presence of firm evidences and not to suspend any detainee for more than one month. But the actions taken by the Henderson Government contradict with the simplest human rights and the provisions of the constitutions which was drawn up by the authorities themselves.

Moreover, the insistence of the authority to hold the trial in secret indicates the great havoc and play undertaken by the intelligence against the citizens and abruption of the simplest rights which are recognised by even many reactionary governments.

During the past months the authority proved its denial for all moral and human characters and in spite of the thousands of signatures made by the citizens in protest against the wishful arrests and the methods of Henderson and his clique, the authority faced these protests with disguise and delay and tried to play with the contradictions existing between the national forces in order to shatter their unity through rumours and intrigues circulated by it to be able to continue its terrorism. But the honest national and democratic forces spoiled and foiled this opportunity for Henderson and all stood to defend the detainees and their freedoms and to demand the release of these detainees placing under considerations the basic contradictions between them all and the colonialist and reactionary authority and that the basic battle at present is to defend the freedoms in the face of the Henderson government and its puppets, the Al-Khalifa family.

The national and democratic forces in Bahrain are required to consolidate their relations. If the steps taken by these forces have aroused some of the puppets to the extent of making them release a stream of insults and abuses in the yellow papers in Bahrain, they are required now to lay down proper methods for comprehensive cooperation and complete adherence to the joint activity in the massive movement and in the struggle against this puppet authority.

As freedoms are being violated in an open manner on these militants islands. Meanwhile, extensive campaigns for solidarity with the Bahraini people is wanted by all honest and freedom-loving forces and, in particular, the Arab federations most prominent of which is the Federation of Arab Lawyers which stood in all its conferences to defend the freedoms in

the Arab homeland putting on its shoulders the responsibility for defending the detainees in any Arab area.

The national and democratic forces in Bahrain will foil

League Commission (Cont'd)

The Shah is determined that his forces are to realise the glory of which he dreamt and Qaboos wants to end the revolution very quickly. He wants to enter the conference with his head up and greetings pouring on him. But the winds bring what is not wanted by the vessels. So once again what is the solution,

After lengthy discussions, those concerned agreed upon saying lies. The Arabs will believe us at least until after the end of the conference after which we will think of another method.

Certainly, what said by Azzawawi is utter lies and distortion. They lied when they denied the invasion and they lied when they claimed that they ended the revolution. They also lied when they said that the revolution will end in the month of Ramadan. They lied because they are ascertained that the Arab League Commission will not come to Muscat again and if it comes they will also lie to it like before. They lied because they are confident that there are forces in the Arab League which will work by all means and ways to prevent the commission from going to the Liberated Zone for getting certain of the situation existing and the identity of the forces which are at present launching the huge military campaign in the South of Oman.

Therefore, we believe that the fact-finding commission of the Arab League, which was formed as a result of a true and national Arab desire for giving an end to the dangers threatening the Arab nation, which threats are represented in the British presence and Iranian invasion of Oman, has to continue its assignment and is therefore required to fulfill the following:-

- 1) To go to Muscat and to ask the Qaboos government to allow it to visit the Iranian position in the Red Line, al-Mammar and Western Region in the South of Oman and to visit the two Iranian bases at Khaisb in Oman and the air base at Thamreet in southern Oman and Ras al-Hadd across the Gulf of Oman.
- 2) To ask the Qaboos government to allow the commission to visit Masirah, Sallalah, Budbud and other centres, camps and British bases.
- 3) To visit the liberated areas for getting acquainted with the nature of conditions there. This is the practical and true interpretation for the "field visit" in the paragraph contained in the

undoubtedly the repressive measures and laws of the authority. The increase of repression and terrorism gives a firm evidence on the huge growth of the massive national movement and its huge insistence to continue the struggle for realising its final aims and objectives.

resolution taken by the Arab League council during its session which was held in Tunis at the beginning of March this year.

At the same time we ask all freedom, progress and justice-loving forces in the world to step up their backing for the just struggle of our people.

Our People Determined (Cont'd)

forces in the Arab. More than a year had passed for the Iranian forces to fight our people, but were unable to harm the revolution in spite of their huge number and modern weapons and equipment.

It is clear that the new Iranian campaign has caused reactions hostile to the puppet regime locally and at Arab and world levels. This increased Arab national hostility and the hostility of the world peace and freedom-loving forces. It also increased the backing and support for the revolution and the just struggle of our people.

The Arab summit Conference is on the door and the puppets fear to have the Iranian invasion of Oman being discussed by this conference. This will place them in the position of the accused who is indicted at Arab level and at top-levels, especially that they admitted and confirmed such invasion. They hope that the conference will come out with resolutions ensuring the despatch of Arab forces to replace the Iranian forces in Oman instead of coming out with the resolution indicting them.

At a time in which we are exposing such statement and their aims, we warn the Arab national regimes and Arab and world national liberation forces against falling in such false claims. We also warn against any step, whatsoever, to be taken by any Arab side for consolidating the position of the traitorous regime in Muscat as this means that they are endorsing the invasion of our country and injustice, oppression and subjugation against our people.

Our people are determined to continue the struggle until genuine national independence is realised.

Visit to Libya (Cont'd)

British colonialism and the Jordanian mercenary forces because such presence contravenes with the wish of the people of Oman.

The Libyan brothers promised to increase their back for the revolution of 9th June in its struggle for expelling the invaders and colonialists and for realising the freedom of the people of Oman.

Arab League Commission Is Required To Reveal All Claims

Qais Abdel Moneim Azzawawi, Minister of State for Foreign Affairs in the Sultanate of the British, announced on Thursday 10th October that the Iranian forces, which he estimated for several thousands and which he revealed to be present for more than one year, have started to leave the Omani territories returning back home after performing their tasks with high skill and handing over their positions to the 'Omani' forces.

What is the conformity between such statements and the factual findings, and to how far true they are?

Perhaps going a little backward will facilitate for us the task of discarding such allegations and such lies which we have been accustomed to hear from the officials in the Sultanate of the British.

1) The Iranian forces have invaded the Omani territories and openly interfered against our people as a result of the secret treaties concluded by Thuweini Bin Shihab in Teheran at the beginning of 1973 with the Shah of Iran on behalf of Qaboos and by authority from the Sultanate of the British.

2) This agreement was followed by another series of secret and open agreements between the two puppet regimes in Muscat and Teheran which agreements gave Iran the right of expanding its military, political, economic and cultural penetration.

3) In addition to the fact that the invasion by the Iranian forces of Oman came as a result of these agreements this invasion goes basically in line with the general strategy of American imperialism and Iranian reaction. We believe that the aim behind the invasion is clear and was proved by the Shah himself in a collection of statements, such as, "We cannot tolerate the presence of hostile guns in the Hormez Strait". He meant by that: "we do not want a national regime in Oman", "our role exceeds its local frame and we have to protect sixty per cent of the needs of the United States, Japan, and West Europe of oil" and "we are going to interfere in the Gulf with or without the consent of the other sides". So, the aim behind the invasion is clear. It is to end and liquidate the armed Omani revolution and to establish the puppet reactionary regime in Muscat, to abort the progressive regime in Democratic Yemen and Arab national movement in this area as well as to establish puppet regimes walk-

ing behind the Iranian regime and submitting to its ambitions to ensure the interests of imperialism and to realise the expansionist strategy of the Shah-in-Shah.

4) The withdrawal of the Iranian forces from Oman cannot take place except after the agreement and announcement of the two sides. This is if we suppose that there is equality between Shah's regime and the Qaboos regime. This announcement cannot be issued by the Shah except if he realised his first aim which is to knock down the revolution, or as called by him, to realise glory. If we suppose that the Iranian forces came to Oman with the aim of opening the Red Line only, then, this aim has not been realised in the way that will enable the Shah to describe it as glory as the Line is still a hell-like under the feet of invaders. The revolution is still controlling the liberated areas and on this area it is establishing its social, cultural, health, military and productive institutions.

Does this mean that the Iranian forces have failed in their assignment and did not realise the glory of which the Shah dreamt? Does the Shah accept to submit to defeat so easily? Otherwise, is there a new interference to save the face water of the invaders, or that the matter is no more than a trick and an open manoeuvre?

It is natural and logic that the statements of Qais Azzawawi are only a trick and open manoeuvre and lies. This is due to the following:

We have been accustomed by the officials in Muscat to hear lies from them. They remained to hide the invasion since the beginning of 1973 upto the first half of this year in spite of statements by the Shah and confirmations by the British and American circles that the Iranian forces have invaded Oman.

2) The Iranian forces are at present launching a huge land, air and sea campaign against the liberated areas with the aim of realising the glory of which the Shah and Qaboos dream.

3) Latest information coming to the front confirmed that Iran recently reinforced its forces existing in the Omani territories and in particular reinforcement of the bases of Khasb in Roos al-Jibal and Thamreet in the south of Oman and its centres in Dhofar.

4) No statement was issued by the Iranian authorities upto now about their intention of withdrawing their forces from the Omani territories.

5) Even if we submit that there are Arab forces to replace the Iranian forces, this will need time for the Arab forces to

replace the Iranian forces.

6) The withdrawal of the Iranian forces - 11,000 men - will place the Qaboos forces in a critical position which may result in retreat in the face of the revolution. This is not in the interest of these enemies since the Iranian Qaboosite, Jordanian and British forces were unable, as a combined force, to realise any strategic gain against the revolution. So, how can the Qaboos forces, which are gathered from the people crumbs can realise such gain or even observe any steadfastness.

7) The United States of America has recently threatened in the tongue of its President Ford that it will take a certain measure against the oil-producing Arab countries. He means, in particular, the Arabian Gulf countries. Here stems the actual role of Iran and its real assignment. We believe there is no better position for it other than its present position in Oman for playing such role.

So, what is the aim behind such statements, namely at this time?

No doubt the Iranian invasion of Oman had caused a national reaction in the Arab world. In spite of the difference in the stands and objectives, yet all Arabs - with the exception of some reactionary regimes which are deeply sunk in hiredom, such as the Jordanian regime, - expressed fears over such invasion and realized the Shah-in-Shah greeds in the area containing genuine national danger. In spite of the weak justifications made by Qaboos, Arab popular and official wrath began to grow side to side with the solidarity and support observed by freedom loving forces the world over. Hence the Front started to secure extensive Arab and world support because it is confronting a national danger which cannot be neglected by our Arab and world friends. All our brothers and friends as well as the Arabs countries endeavoured to give an end to such interference each springing from its nature, role and place. The reactionary Arab countries, for instance, want to end the invasion but at the same time they want the stay of the puppet regime in Muscat unless it shows its non-preparedness to cooperate with them. The national countries, emanating from their care for the national interest, want to end this invasion and see that this cannot be achieved except by backing the revolution because it is actually confronting the invaders. The Arab progressive and patriotic forces as well as the world forces of freedom,

peace and socialism stand for ending the foreign presence, liquidating the puppet regime and to set up the national democratic rule serving the Omani People's interests and objectives.

Furthermore, the masses of the Omani people have had indignation and malice reaching a degree in which the regime became in a very critical position. The regime started to face wrath, indignation, and malice at Omani, Arab and international levels, with desperation.

For the first time in the history of the Arab League, the views and opinions of its members have united in spite of the difference in their social systems. It is also for the first time that the Arab League recognises two authorities in one country - not voluntarily but a stand imposed by the sacrifices and struggles of our Omani people and their glorious revolution.

From here came the formation of the Arab League fact-finding commission to investigate the nature of the conditions existing in Oman, which conditions we believe are still existing. Moreover, its assignment has renewed after the recent statements of Qais Azzawawi.

Thus, the puppet regime in Muscat and its allies and masters have to think of a way out from this very critical position. Accordingly, series of semi-daily contacts are taking place among puppet regime in Muscat and the Shah of Iran on one hand, and some Arab sides and the Shah, on the other. The contacts is taking place very speedily.

The Arab summit conference is on the doors and Ramadan has finished while the revolution did not end as Qaboos promised. It appears that he received a promise from the Shah as the campaign started late. It also appears that the time given for the operation for ending the revolution was wrong. There are sides in the Arab League working for breaking the fact-finding commission or ending its assignment by submitting a report taking into consideration the standpoint of Qaboos. On the other hand, there are other sides including the revolution - working for the continuation of the commission. This means that the situation is critical and there must be a way out for the regime. These are pictures formed by the rulers of Teheran, Muscat and the Arab regimes which orbit in their circles. They are uselessly moving for finding a way out.

Cont'd Page 3
