

S H A R J A H

ITS FIVE GOLDEN YEARS

(By Khalid Bin Sultan Alqasimi, Director of Air & Sea Ports Administration).

On the 24th of June, 1965 at precisely 10 a.m. Sarjah was reborn and the people of Sharjah awoke that morning to find that someone had come to save their Country from careless ruling and the people began cheering and congratulating each other over the unexpected change in the town. Someone had taken over the Government.

Let me introduce him to you; He is HIS HIGHNESS SHAIKH KHALID BIN MOHAMMAD ALQASIMI - THE RULER OF SHARJAH, AND ITS DEPENDENCIES. This 39yrs. old, charming, religious, and sincere man, placed his people and his country before himself. On the 24th of June, 1965, he thought of the present state of affairs in Sharjah and accepted the call of his country, so he took over.

When he became RULER, he found the Country bankrupt. Sharjah had no electricity except for the Palace. The water was supplied by Motor Tankers, not one single road was asphalted and there were no modern buildings - briefly there was absolutely nothing.

His young brain kept working day and night and meetings with the Directors of his Government never stopped. He had to save his country in order to join the other countries in the benefits of development. GOD ALMIGHTY was with him and there he started at the right point.

- 1st. Plan's for the Town.
- 2nd. Developeng a road system.
- 3rd. Compensation to the People who lost their lands.
- 4th. Increase in the Electricity Power Supply.
- 5th. Underground water pipes to reach every house in the Town.
- 6th. Increase of the water supply.
- 7th. Asphalt roads.
- 8th. Modern street lighting.
- 9th. Building a deep water Jetty (specifications to follow).
- 10th. Contracting a modern Airport Building.
- 11th. Signing Oil concessions inland and offshore (This gives the Government revenue which covers some of it's expenses).
- 12th. An up to date Hospital - most of it's equipment is electronic
- 13th. Developing an efficient Municipality.
- 14th. The Police force started with a small number of men and is increasing daily, trained by a highly qualified expert, Scotsman Major J. Burns and assisted by Major D. Turner. This Department of the Government is a part of it's life, as there is no Government without security. The Police Force is strongly supported by His Highness.

MEMORANDUM

MEMORANDUM FOR THE DIRECTOR

(By David H. Miller, Director of Air & Sea Ports Administration)

On the 24th of June, 1966 at precisely 10 a.m. British was reform and the people of Spanish were that morning to find that someone had come to save their country from economic collapse and the people began cheering and congratulating each other over the unexpected change in the town. Someone had taken over the Government.

Let me introduce you to you: He is HIS HIGHNESS SHARIF KHALID BIN AHMED AL-SAUDI - THE RULER OF SAUDI ARABIA, AND HIS DEPUTY SHARIF SAUD BIN ABU SAUD, and since we, British, had placed his people and his country before himself. On the 24th of June, 1966, he thought of the present state to British in Spanish and accepted the call of his country, so he took over.

When he became RULER, he found the country bankrupt. Spanish had no electricity except for the island. The water was supplied by motor pumps, not one single road was asphalted and there were no modern buildings - strictly there was absolutely nothing.

His young brain kept working day and night and meeting with the Ministers of his Government never stopped. He had to save his country in order to join the other countries in the process of development. HIS HIGHNESS SAUD BIN ABU SAUD and there he started at the right point.

- 1st. Plan for the Town.
- 2nd. Develop a road system.
- 3rd. Compensation to the people who lost their lands.
- 4th. Increase in the electricity power supply.
- 5th. Underground water pipes to reach every house in the town.
- 6th. Increase of the water supply.
- 7th. Asphalt roads.
- 8th. Modern street lighting.
- 9th. Building a deep water jetty (specifications to follow).
- 10th. Constructing a modern airport building.
- 11th. Signing oil concessions inland and offshore (This gives the Government revenue which covers most of its expenses).
- 12th. An up to date Hospital - most of its equipment is electronic.
- 13th. Developing an efficient municipality.
- 14th. The police force started with a small number of men and is increasing daily, trained by a highly qualified expert. The Government Major J. Burns and assisted by Major D. Turner. This is no Government without security. The police force is strongly supported by His Highness.

15th. AGRICULTURE. There are one hundred square miles under development and the lands are given free to those who want to start cultivation and these Market Gardens have already started producing fruit and vegetables. Apart from dates the following are produced: ~~fruits~~ Lemons, limes, chicos, guavas, bananas, mulberries etc., etc.

16th. Last but not least HIS HIGHNESS has signed an agreement to develop a sheltered harbour, which is being constructed adjacent to the town and is still in progress. The harbour will accept ships upto 3,000 tons and will have over 1,000ft. of quay.

In 1969 when THE RULER signed the contract someone told him "the piling hammer will disturb your people by making such a noise". HIS HIGHNESS'S reply was - "never will it disturb, this is the music of their future".

On the 8th. of May, 1970, the Dredger started it's work in deepening the Harbour and continuing the future of Sharjah.

There are many things in HIS HIGHNESS'S mind still to be done and only the future will tell INSHA ALLAH.

THE SHARJAH DEPENDENCIES

Sharjah extends from the Arabian Gulf as far as the ~~Sea~~ ^{Subsident} capital town being Sharjah. In the Eastern Province the capital is Kalba, the commercial capital is Khor - Fakkan.

The agricultural developments are advancing at Dhaid Oasis and Mulaha.

The following are the names of the Sharjah dependencies:- Kalba, Khor - Fakkan, Diba, Hemryah, Khan Layyah and Wadi Alhelu, the latter growing tobacco which is exported.

There are two islands belonging to Sharjah in the Gulf, one of which Abu-Musa produces large quantities of red iron oxide, the latter being Sir Abu-Nair, which is 30 miles from the oil wells of Abu Dhabi.

GOVERNMENT DEPARTMENTS

1. Municipality of Sharjah.
2. Petroleum & Mineral Affairs.
3. Air & Sea Ports Administration.
4. Education Department.
5. Police Force Department.
6. Labour & Social Affairs Department.
7. Post Office.
8. Electricity & Water Department.
9. Legal Courts.
10. Islamic Sharia Court.
11. Government Accounts Department.
12. Land Department.

1955. AGRICULTURE. There are one hundred square miles under development and the lands are given free to those who want to start out - and these lands have already started production. Apart from the following are products: fruits and vegetables. Apples, pears, bananas, pineapples, etc., etc.

1956. AGRICULTURE. Mr. HIGGINS has signed an agreement to develop a sheltered harbor, which is being constructed adjacent to the town and is still in progress. The harbor will accept about 2,000 tons and will have over 1,000 ft. of quay.

In 1959 when THE HULLER signed the contract someone told him "the Huller never will disturb your people by asking such a note". Mr. HIGGINS's reply was - "never will it disturb, this is the name of their future".

On the 8th of May, 1970, the Deedger started it's work in deepening the Harbour and continuing the future of Sharjah.

There are many things in Mr. HIGGINS's mind still to be done and only the future will tell HERA ALLEN.

THE ARABIAN DEPENDENCIES

Sharjah extends from the Arabian Gulf as far as the Jebel Jais, capital town being Sharjah. In the Eastern Province the capital is Umm Al-Qaiwain. The commercial capital is Ras - Rakhman.

The agricultural developments are advancing at Dubai Oasis and Ajman.

The following are the names of the Arabian dependencies:-
Ajman, Ras - Rakhman, Umm Al-Qaiwain, Ras - Al-Khaimah, the latter producing tobacco which is exported.

There are two islands belonging to Sharjah in the Gulf, one of which produces large quantities of red iron oxide, the other being Ras Al-Hair, which is 30 miles from the old walls of Abu Dhabi.

GOVERNMENT DEPARTMENTS

1. Municipality of Sharjah.
2. Petroleum & Mineral Affairs.
3. Air & Sea Ports Administration.
4. Education Department.
5. Police Force Department.
6. Labour & Social Affairs Department.
7. Post Office.
8. Electricity & Water Department.
9. Legal Courts.
10. Islamic Sharia Court.
11. Government Accounts Department.
12. Land Department.

AIR & SEA PORTS

AIRPORT

Sharjah Airport is 38 years old. The run-way is 7,500 feet long and 100 feet wide. It is equipped with Radar and Radio guidance and is operational day and night. The building has a transit hall, tax-free shop, VIP room, departure hall, handling office, immigration office, Health Inspection Office, Police Department and stores for transit goods. The Airport will handle the Aircraft within 35 minutes minimum.

It also has an Air training School with qualified Pilots, which issues a certificate approved by the Board of trade in the U.K. This School has two brand new single engined Pipers and we are expecting the delivery of four more.

SEA PORTS

a) SHARJAH

The deep water Jetty, specifications are as follows:-

1. Distance of the Pier (middle) from sea shore (abutment) 2,000 ft
2. Length of the Pier (platform) 270 ft
3. Breadth of the Pier 104 ft
4. Depth of Water L.T.L. 30 ft
5. Depth of Water H. T. L. 34 ft
6. Height of the Pier above sea bed 45 ft

b) KHOR-PAKKAN

Khor-Pakkan has a large natural harbour which provides excellent shelter for shipping as it is protected on three sides by mountains. As Khor-Pakkan is the commercial centre for the coast of the Gulf of Oman, it has been provided with a small Jetty which can accept three to four thousand ton vessels. For the larger ships goods can be off-loaded by barges between the ship and the Jetty.

GENERAL

General Airport is 38 years old. The runway is 1,500 feet long and 100 feet wide. It is equipped with radar and radio aids and is operational day and night. The building has a transit office, navigation department, baggage hall, handling office, inspection office, investigation office, police department and stores for transit goods. The airport will handle the aircraft within 25 statute miles.

It also has an Air Training School with qualified pilots, which issues a certificate approved by the Board of Trade in the U.K. This school has two examiners and engine engine pilots and we are expecting the delivery of four more.

SHIP AND

WATERWAY a)

The deep water jetty, specifications are as follows:-

1. Distance of the pier (abside) from sea shore (abside) 2,000 ft
2. Length of the pier (abside) 210 ft
3. Breadth of the pier 104 ft
4. Depth of water L.T.L. 20 ft
5. Depth of water H.T.L. 24 ft
6. Height of the pier above sea bed 43 ft

WATERWAY b)

The waterway has a large natural harbor which provides excellent shelter for shipping as it is protected on three sides by mountains. The waterway is the commercial center for the coast of the Gulf of Oman. It has been provided with a small jetty which can accept three to four thousand tons of cargo. For the larger ships goods can be off-loaded by barges between the ship and the jetty.
