The anniversary of the immortal 9th June revolution will come after a few days and this year the tenth anniversary of the triumphant Omani revolution coincides with this year's anniversary, which comes amidst an imperialist and reactionary offensive never witnessed by Oman in its history. Oman today is occupied by the forces of Britain, Iran, Jordan beside hundreds of American experts and mercenaries from different nationalities. Foreign bases of different nationalities are scattered all over Oman. In turn the Omani people is showing superior heroism in resisting the invaders and occupationists. In the face of the oppression and repression of the authority there is wonderful steadfastness demonstrated by our Omani masses.

In view of the importance of this dear anniversary to the hearts of our Omani people and the Arab peoples and progressives in the world, and in view of the need to show further support and sympathy with the revolution of our people and their struggle, the Information Committee deemed it necessary that the national forces and Arab progressive elements to take part in assessing their opinions and expressing their view points towards the revolution of the Omani people and what is going on in Oman today.

Q.1) The Jordanian regime sent its forces to fight the revolution of the Omani people side by side with the forces of Iranian invasion and the British forces. So what is your view over the role of the Jordanian regime in exporting anti-revolution?

Q.2) After days the tenth anniversary of the 9th June revolution comes and by that the revolution of 9th June would have seen a complete decay of armed struggle becoming one of the longest Arab revolutions. So what is your opinion over the most important accomplishments and evidences of the Omani revolution?

Q.3) The revolution of 9th June is confronting imperialism and the puppet reactionary regimes in an area regarded as one of the most important fortress of its fortresses. So what is the importance of the 9th June revolution in confrontation by the Arab nation and its progressive forces and organisations for American imperialism and the puppet reactionary regime.

After a few days the anniversary of the immortal 9th June revolution which is being celebrated by our masses in Oman and the Arab masses and progressive and democratic forces in the world, falls. The 9th June anniversary this year comes to coincide with the tenth anniversary of the revolution and as such gains greater importance with the masses and friends of the revolution.

A great responsibility is lying on the friends of the revolution during celebration of this great occasion at the level of the importance of the tenth anniversary so that the celebrations come as an extensive sign for expressing the support and backing for the revolution of 9th June amidst circumstances of extensive plotting and aggression by the forces of imperialism and reaction in order to constitute a decisive reply to the enemies of the revolution.

Therefore, we suggest that the Support Committees and also the revolution become of extensive effectiveness for which the broadest masses are mobilised and in which the broadest democratic forces and freedom and peace-loving forces take part for extending the circle of solidarity and support acts.

Moreover it is necessary to assort the effectiveness and make it pour in different energies in which the largest number is taking part. Accordingly we suggest as follows:-
