Common Communique About The  
Talk Between The Popular Front  
For The Liberation Of Occupied  
ARABIAN Gulf & The National Democratic  
Front For The Liberation of  
Oman & occupied Gulf

Upon the invitation by the Popular Front For the Liberation of Occupied Gulf (PFLOG) to the General Command of the National Democratic Front for the Liberation of Oman & Occupied Gulf (NDFLOOG) after the flare of armed revolution in the interior Oman - Detailed talk took place between the delegation of (PFLOG) & the delegation of (NDFLOOG) and discussed all the important issues projecting themselves on the revolution in the area and the bilateral relation between the two fronts.

The two delegations reviewed the political-economic situation in Oman & the Occupied Gulf, the qualitative development in the area and the new-imperialist plans to tighten the imperialist grasp and their clients in the area.

The two Fronts view that Oman & the Occupied Gulf is facing a wide imperialist plan to tighten the grasp of the imperialists the feudal families and oil monopolists in the area and tighten its relation with the world capitalists market and the new-capitalism by new methods which differ completely from the old methods followed by the British colonialism through its occupation the area.

The British colonialism, through its declaration of withdrawal and adaptation of the false union between its clients, is trying to put in order the deteriorating situation which the British themselves created and catered through its occupation period; for it is impossible for the clients and the feudal families, which can't foresee far, to typass its enterests and work for the welfare of our people and its progress. There-fore, the game of unity which offers new capabilities to the imperialists to tighten their grasp can it be accomplished by the deteriorating ferdal families. The British Colonialism which kept Oman in a very undeveloped ignorant situation has found the necessary to change its puppet, Saeed bin Taimoor with the puppet Kaboos and to change from the old colonial style to the new-colonial style upon the spread of the armed revolution in Interior Oman and the Great Capeabilities which the revolution projected to eliminate the deteriorated colonial reactionary demination.

The two fronts, after reviewing the overall developments in Oman and the Occupied Gulf the mode of the presents stage and the deteriorating situation of our people's life view that area is passing in the stage of national liberation whose responsibilities, its passage and the realization of the required accomplishments fall on all the national forces in the area.

Arising from the Common belief of the neccesasity for the harsh, long struggle against the colonialism and its clients, the need for the adoptation of all sruggle forms against its interests and clients, and the adoptation of armed struggle as the main basic mean to accomplish the national liberation tasks; the two fronts calls on all the national forces in Oman and the Arabian Gulf to group in abroad national front to eliminate colonial presence, put an end to the fule of feudal families, establish progressive national rule and realize all the required accomplishments at this stage.

The two fronts view the necessity for a quick programmed move by the sincere national forces, the need for following the most developed forms of struggle against the colonialist and its client and shift from retarded stands to more developed stands where the national forces can direct its struggle against the colonialist and its clients.

The national forces must be aware of the basic contradiction in our area and work for solving it for the masse's interest at this stage. Arising from the common strict struggle carried by the two fronts and their common view to all the political and revolutionary issues, assure our conscious masses and the patriots the unity of two fronts, their common responsibility in developing the armed struggle against the colonialists and its clients, the coordination in all military political aspects and working hard for the realization of total fusion within programmed conscious steps necessary for the needs of struggle and its circumstances.

The international imperialism and the reactionary forces in the area are planning to undermine the progressive movements in overall Arabian Peninsula, and are putting all the capabilities which should be devoted for the welfare of the people to eliminate the revolutionary mode in the Arabian Peninsula. Our area witnessed lately and open reactionary movements directed against the armed revolution and the progressive regime in the People's Democratic Republic of Yemen after accomplishing temporary victory in Northern Yemen.

The two fronts strongly denounce these reactionary suspected movements and calls upon all sincere national and the deceived ones to desert the anti-revolution side which aims at destroying the great accomplishments realized by the popular revolution and destroying any national movement at this stage so as to lighten the grasp of the imperialist in our area. The two fronts denounce the open reactionary interference against the People's Democratic Republic Yemen by the Saudi Autocracy which is aimed at separating some regions destroying the progressive revolution in the Gulf and establishing satellite state in the area. The two fronts call upon all the progressive forces to undermine this reactionary plan and hit with an iron fist on everybody tempted to gamble with the interests of people. The two fronts support and stand firmly beside the progressive regime in the People's Democratic of Yemen in its struggle against the imperial interference. The progressive measures, and the honorable, courageous stand towards our armed revolution in this area.

The two fronts, upon realizing the side imperial plan directed to elimination of the revolutionary mood in the Arabian Peninsula, stress the necessity of a prompt meeting between the national forces in the Peninsula to establish a national Democratic regimes and the unified retaliation at the imperial reactionary plans.

The two fronts, upon reviewing the overall revolutionary Arab stance, assures their absolute support for the Palestinian Resistance and strictly defame all the liquidatory plots undertaken by the puppet reactionary Jordanian regime leaning on wide Arabian support to slaughter for the resistance movements. So as to be able to realize settlement with Isreal and execute the imperialist plan represented by defamed plan. The two fronts denounce the claims for the establishment of Palestenian State. and assures that except a long-range popular war where all the conscious Arab masses participitate in a harsh struggle against the American imperialism its client in the area, and its main base, Isreal. The two

fronts assures the neccesity of national unity between the active, revolutionary regiments in Palestine and support all steps aimed at realizing this basic demand.

The two fronts stated their absolute support to all the national liberation movements aiming at the elimination of imperial control on their countries. The two fronts declared their absolute support to the Vietnmese people revolution and the people of Gambodia Laos and Korea in their struggle against American imperialism and the accomplishment of national soveregionity and national unity for the people of these contries. They declare their absolute support for the people of Eretria Somalia in their struggle against the Etheopian foreign colonialism and highly evaluate the prompt, neccesity to estblish volose compatriot relation and (mutual) cooperation between the national liberation movements and the social-ist forces in the world to inflict more hits against imperialism, local reactionaries and accomplish more victories for the suppressed poor nation and the movement of wald peace & progress.
